

# Public consultation on the EU Commissions proposal for a Sustainable Use of Pesticides Regulation

---

To: Department of Agriculture, Food and the Marine

## **Uplift members' submission to the Public consultation on the EU Commissions proposal for a Sustainable Use of Pesticides Regulation:**

- We want pesticides used only as a last resort. Pesticides destroy soil, pollute water, destroy biodiversity, harm our health and force farmers to be dependent on costly toxic chemicals.
- Ireland should aim for a reduction of 80% of synthetic chemical pesticides by 2030.
- Vote with other EU States to stop the licence from allowing toxic glyphosate use.
- Support farmers and small-scale food producers to transition to more ecological methods of farming and food production.
- The definition of pesticides should specify 'chemical pesticides' in order not to include biocontrol, a method of controlling pests, such as insects, mites, weeds, and plant diseases, using other organisms.

- Define reduction targets, timelines and measures to reduce dependency, not only for the five most used pesticides but for all chemical pesticides.
- Full transparency and controls of all pesticide use i.e. detailed and monitored measuring and record-keeping by everyone involved.
- An immediate end to desiccation to the practice of spraying glyphosate on food crops before harvesting.
- Ban chemical pesticides in all sensitive areas (including railways, sports grounds, roads, playgrounds, schools, public gardens, sensitive habitats, woodlands and forests) as well as for private use.
- Apply a polluter pays principle where it is found that excessive use has occurred.
